

CHAU BINH NGUYEN

Backend Developer

0941.681.810
nguyenchau16112004@gmail.com
Ho Chi Minh City, Vietnam

Backend Developer with basic experience in Java, Spring, and SQL. Have worked on simple REST APIs, OAuth2 flows, and used Docker to run services, inspect logs, and write Dockerfiles and docker-compose configurations in a microservices environment. Eager to learn, contribute to real-world backend projects, and grow my knowledge of Java development.

EDUCATION

Ho Chi Minh City Open University | 2022-2026 | Bachelor of Information Technology (Software Engineer)

WORK EXPERIENCE

Mantis Vietnam Company | Backend Developer | Oct 2025 - Dec 2025

Project: Real Estate Web App

Overview: AI-powered property search platform to help users find homes according to their preferences.

Tech stack: Java, Spring Boot, PostgreSQL, Docker

Key features:

- Authentication: JWT session management.
- Property Listings: CRUD endpoints, filtering, and search for available properties.
- Database Design: Optimized the PostgreSQL database schema and designed relational tables.
- Integration: Backend APIs connected with Next.js frontend.
- Testing & Docs: Created unit tests and API documentation.

PERSONAL PROJECTS

MICROSERVICES TASK MANAGEMENT SYSTEM

Description: A distributed task management system built on a Microservices architecture, allowing users to manage Boards, Columns, and Cards (similar to Trello) with high scalability and service isolation.

Tech stack: Java, Spring Boot, Eureka, Spring Security, Spring Data JPA, OAuth2/JWT, PostgreSQL, Docker

Role: Backend

- Developed the Task Service module, including core APIs for managing Boards and Cards.
- Set up the Microservices infrastructure, implementing Service Discovery (Eureka) and API Gateway routing.
- Containerized the services and configured the local deployment environment using Docker and Docker Compose.
- Operated, monitored logs, and debugged the distributed system within the Docker environment.

ENGLISH LEARNING PLATFORM AI MICROSERVICES

Description: AI-powered web platform for learning English with vocabulary lessons, tests, progress tracking, and an AI study assistant, built using a microservices architecture.

Tech stack: Java, Spring Boot, Eureka, Spring Security, Spring Data JPA, OAuth2/JWT, PostgreSQL, Docker, Ollama (LLaMA 3)

Role: Backend

- Designed and implemented a microservices architecture using Spring Boot, Eureka, and PostgreSQL to support scalability and easy maintenance.
- Integrated LLaMA 3 via Ollama to build an AI study assistant and Text-to-Speech features for personalized learning.
- Implemented secure authentication with OAuth2 and JWT, real-time communication using WebSockets, and an automated grading system for vocabulary tests.
- Containerized the system using Docker and Docker Compose, and ensured reliable core logic with unit testing using JUnit and Mockito.

SKILL

- **Programming:** Java, Python, JavaScript (TypeScript), SQL
- **Security:** OAuth2, Spring Security
- **Framework:** Spring Boot, FastAPI, Next.js, MVC pattern
- **Database:** PostgreSQL, MySQL, Redis, Spring JPA
- **Concepts:** Microservices, WebSocket, RESTful API, Kafka (beginner)
- **Tools:** Git, Docker, Postman
- Windows, Linux, Office, troubleshooting
- Working on English environment.
- English for communication

CERTIFICATIONS

Java Developer - Spring Boot, MongoDB, RESTful API, Microservices, Docker & Cloud | 01/2026 - Now

- Information Technology Center – University of Science

DevOps for Fresher | 2025

- Devopsedu.vn
- Linux admin, Git/GitLab workflow, CI/CD (GitLab CI, Jenkins), deploy FE/BE with Nginx/Apache, basic Docker, strong debugging
